Career Objective

Developer with practical experience shipping real websites and handling full-stack deployments. I enjoy writing clean code, solving problems, and working closely with clients. Looking for a full-stack role where I can contribute meaningfully and grow further.

Skills

Web Stack: HTML5, CSS3, Tailwind CSS, React.js, Next.js, Axios
Java Full Stack: Core Java, JDBC, Servlets, JSP, Spring, Spring Boot, Hibernate, REST APIs
Backend & Database: Node.js, Express.js, RESTful APIs, JWT Authentication, Oracle SQL, MongoDB, Mongoose
Languages: C++, Java, JavaScript
Cloud & DevOps: AWS, Microsoft Azure, Azure DevOps, CI/CD Pipelines (Classic & YAML), Docker
Tools & Others: Git, GitHub, Postman, HTTPie, System Design

Professional Experience

Sprintofy Full Stack Developer
Feb 2026 – Present

- Collaborated directly with clients in regular meetings to understand requirements, discuss feature changes, and refine product direction.
- Built and deployed multiple production websites and applications, including playnear.in and hesprosports.com.
- Handled complete VPS deployments — setting up backend, frontend, and database environments from scratch on live servers.
- Developed a dynamic sports event platform with responsive UI, real-time event data via REST APIs, and reusable React + Tailwind components.
- Implemented dynamic routing, optimized mobile performance, and structured backend-ready data models aligned with SQL schemas.
- Worked on debugging complex state management, type safety, and API integration issues in a scalable component architecture.

Projects

SUBSCRIPTION MANAGEMENT API (Backend Project)
Subscription Tracker REST API (Node.js, Express.js, MongoDB, Upstash, Arcjet, JWT, Nodemailer)
- Built a production-ready backend for managing user subscriptions and plans.
- Implemented secure authentication, rate limiting, and abuse protection.
- Integrated email notifications and background processing.

AI CHATBOT (MERN FULL STACK)
AI-Powered Chat Application (MongoDB, Express.js, React.js, Node.js)
- Built a full-stack AI chat app using the MERN stack by intergraing OpenAI.
- Integrated backend APIs and persisted chat history.

MULTI-TENANT SAAS PROJECT MANAGEMENT PLATFORM (NEXT.JS)
Full-Stack Multi-Tenant SaaS (Next.js App Router, TypeScript, Prisma, PostgreSQL, Stripe, Clerk, Tailwind CSS, shadcn/ui)
- Built a production-ready multi-tenant SaaS with organization workspaces, role-based access control (Owner/Admin/Member), and strict data isolation using Prisma + PostgreSQL.

- Implemented Stripe subscriptions with webhooks, Customer Portal, and feature gating, alongside Server Actions, React Server Components, and optimistic UI updates.
- Developed drag-and-drop Kanban boards, real-time task management, email invitations (Resend), analytics dashboard, soft deletes, and audit logs with TypeScript strict mode and Zod validation.

AI EXPENSE TRACKER (FULL STACK) Live: cocowallet-lovat.vercel.app

AI-Powered Personal Finance Tracker (Node.js, Express, TypeScript, MySQL, Google Gemini, React)

- Built a production-grade REST API with TypeScript, Express 5, MySQL (connection pooling), JWT authentication (access + refresh token rotation), and comprehensive security (Helmet, rate limiting, Zod validation, HPP).
- Integrated Google Gemini 2.0 Flash for intelligent expense categorization, AI-generated budget suggestions from historical spending, and natural language financial queries.
- Implemented advanced features including bulk CSV import (up to 1000 expenses), real-time spending statistics, category-based budgets, soft deletes, and Swagger/OpenAPI documentation.
- Designed modular, scalable architecture with structured logging (Pino), request tracing, and full TypeScript strict mode + Jest test suite.

LIBRARY MANAGEMENT SYSTEM (JAVA FULL STACK)

Java Full Stack Library Management System (Core Java, JDBC, Servlets, JSP, Spring Boot, Hibernate, REST APIs, MySQL)

- Built a full-stack application using Spring Boot, Spring MVC with JSP/JSTL views, and Spring Data JPA with Hibernate 6 for ORM-based CRUD operations across 6 normalized tables.
- Developed RESTful APIs with DTOs, global exception handling, and proper HTTP status codes, alongside a legacy module demonstrating raw JDBC and HttpServlet implementations.
- Implemented book borrowing/returning system with due date tracking, overdue fine calculation, multi-criteria search, and pagination with Bootstrap-responsive JSP frontend.

CI/CD PIPELINE – YOUTUBE CLONE WEB APP

CI/CD Implementation using Azure DevOps (Azure App Service, YAML Pipelines)

- Built end-to-end CI/CD pipelines with multi-stage deployments to Azure App Service.
- Configured Blue-Green deployments using deployment slots for zero-downtime releases.

Certificates & Coursework

Full Stack Software Developer – **IBM** link
Backend Development– **IBM** link
Fundamentals of Deep Learning – **NVIDIA** link
Advanced course on Green Skills and Artificial Intelligence – **EDUNET FOUNDATION** link
Smart India Hackathon(SIH) 2025 link
Data Structures& Algorithms,Database Management Systems,Operating Systems,Computer Networks.

Education & Extra Curricular

Vishwakarma University : BTech Computer Engineering 2026 CGPA-**8.22**
Participated in ALL India hackathon(SIH) 2 times, CTF competition, 3rd place in Internal hackathon, Volunteered for India First Tech Challenge (FTC).
